Simplifying Sustainable Heating

HITACHI

FAST CONNECT Wiring Centre

Take the worry out of your Hitachi Heat Pump installation

So often we find with heat pumps the plumber gets all the training and the electrician is just left with an ambiguous instruction manual. There so many things to take into account when wiring an air source heat pump;

How do I wire up the room thermostat/s?

How do the electricity meters have to be installed to meet MCS Compliance regs?

How many cores do I need to run to the outdoor unit to power all the indoor components?

Why not take all of the stress away and reduce your time onsite using a Hitachi FAST WIRING CENTRE

- ✔ Pre-Wired Hager Dist Board with fitted meters and labelled DIN Rail terminals
- ✔ Separate Powered Circuits for the Heat Pump, Heating Control and Immersion
- ✔ Quick and Easy 'Click' connector for easy wiring of components
- ✔ On/Off/Auto Contactor enabling manual override of the immersion
- ✔ 15m Multi-core SY Umbilical Cable powering all indoor components
- ✔ 2 x 15m mult-core 0.75mm Belden Screened cables for sensors and heat pump controller

All the benefits without the hassle!

The Hitachi Fast Connect wiring Centre from Spire Renewables has been built from the ground up to make your installation as trouble free as possible. By utilising high end and fully tested components from top manufacturers you can rely on the fact that not only will the Fast Connect board take the worry out of your installation, it will also provide worry free operation for years to come.

- ✔ 1 x Hager Dist Board incl 63A RCD
- ✔ Click Connector for immersion
- ✔ 15m SY multicore umbilical cable
- ✔ 2 x 15m 0.75mm Belden cables for Sensors and HP Controller
- ✔ 1 x ON/OFF/AUTO Contactor
- ✔ 1x Easy to Follow Manual
- ✔ 2 x DIN Rail mounted Electricity meters
- ✔ Suitably Sized Hager breakers for the HP
- ✔ MCB's for immersion and heating control
- ✔ No need to buy the Hitachi Mirror box!
